SUMMARY

Senior Member of Technical Staff with 10 years of expertise in Java, Spring, and AWS, specializing in crafting robust and scalable server-side solutions. Proven track record in optimizing system performance and delivering high-quality applications. Eager to expand expertise by learning new programming languages and technologies.

EDUCATION

Maharaja Surajmal Institute Of Technology

BTech in ECE
2009 - 2013

SKILLS

- Java
- Spring
- AWS
- Python
- Golang
- Github
- Kubernetes
- Docker
- Helm Charts
- REST API
- GRPC
- Protobuf
- FoundationDB
- MySQL
- PostgreSQL

PROFESSIONAL EXPERIENCE

Senior Member Of Technical Staff

VMware | April-2021 - Present

- Worked on SaaS-based metrics monitoring and analytics platform
- Collaborate with Stakeholders to Define Requirements
- Design and develop scalable solutions, ensuring code quality and performance optimization
- Implement and execute unit tests to ensure functionality and reliability
- Work with DevOps to deploy features and updates, following CI/CD practices
- Mentor and support junior developers and new team members, fostering a collaborative environment
- Stay updated on industry trends and suggest improvements to enhance team efficiency and code quality

Lead, Software Engineer

Zyme(Now E2open) | June-2019 - March-2021

- Design and developed Rebate Engine, a system that automates the calculation, tracking, and processing of rebate agreements between suppliers and buyers
- Facilitate clear communication and collaboration across development, operations, and business teams to ensure alignment, progress, and smooth project execution.
- Work with DevOps to deploy features and updates, following CI/CD practices

Member Of Technical Staff

Nutanix(Contract Of Goldstone Technologies Limited) | Oct-2018 - May-2019

- Developed robust SDKs in Python and Java
- Ensuring seamless compatibility with AWS S3 for cloud storage integration
- Wrote comprehensive unit and end-to-end functional tests to ensure code reliability, performance, and seamless AWS S3 interactions

Senior Software Engineer

VMware(Contract Of Magna Infotech) | Nov-2016 - April-2018

- Worked on agent-based monitoring system.
- Designed, implemented, and optimized new features
- Collaborated with cross-functional teams to identify, troubleshoot, and resolve bugs

Product Engineer

EdgeVerve Systems Limited and Infosys | Feb-2014 - Oct-2016

- Worked on Bank Of America project based on Java Spring and Hibernate
- Developed and implemented Proof of Concepts (POCs) to evaluate new technologies and drive innovation for business solutions.
- Ensuring smooth running of the applications and meet the SLA
